	Phone		

When participating in activities at Itakura Airfield, we recommend new corona vaccination to prevent infection and aggravation.

Please check the boxes that apply during the two weeks prior to use. If you do not check any of the items below, please refrain from visiting.

- Body temperature must be below 37.0 degrees
- There are no symptoms of a cold such as fever, cough and sore throat, dullness, stuffy breath, abnormal smell and taste, heavy body, and easy fatigue.
- There is no close contact with those who are positive for the new COVID-19 infection.
- No one is suspected to be infected by close friends such as family members or people in the same workplace.
- There are no entry restrictions from the government within the last two weeks, travel to countries, regions, etc. that require an observation period after entry, or close contact with the resident. However, if the waiting period after entry is shortened in accordance with the government policy, the shortened waiting period shall be followed.
- Must not have been tested positive for new COVID-19 infection within two weeks.
- I haven't attended a drinking party within the last two weeks. (Excluding quiet drinking at home and with 4 or less people)
- ※ Those who do not check any of the above may not be allowed to visit the venue.
- ※ This information will only be used to prevent the spread of the new coronavirus infection.
